ANSWERS

5) Becky buys 2m of ribbon.

She is making bows for wrapping presents.

Each bow uses 10cm of ribbon.

What is the total number of ribbons she can make?

$$2\text{m} = 200\text{cm}$$

$$200 \div 10 = 20$$

20

ANSWERS

6) Jamie is cutting some wood to make himself a table.

He starts off with a 4m plank of wood.

He makes 3 cuts.

His plank of wood is now 2m 80cm long.

Find at least five different ways that he could have made his three cuts.

One has been done for you.

Any three measurements that add up to total 1m 20cm / 120cm.

80cm
